

Channelings of the Everlasting Gospel, by Allen Michael, Book 1: *“From the Universe, to The Youth of the World”*. Artwork by Joe Kinnee

Galactic Science And The Dynadran Power Unit

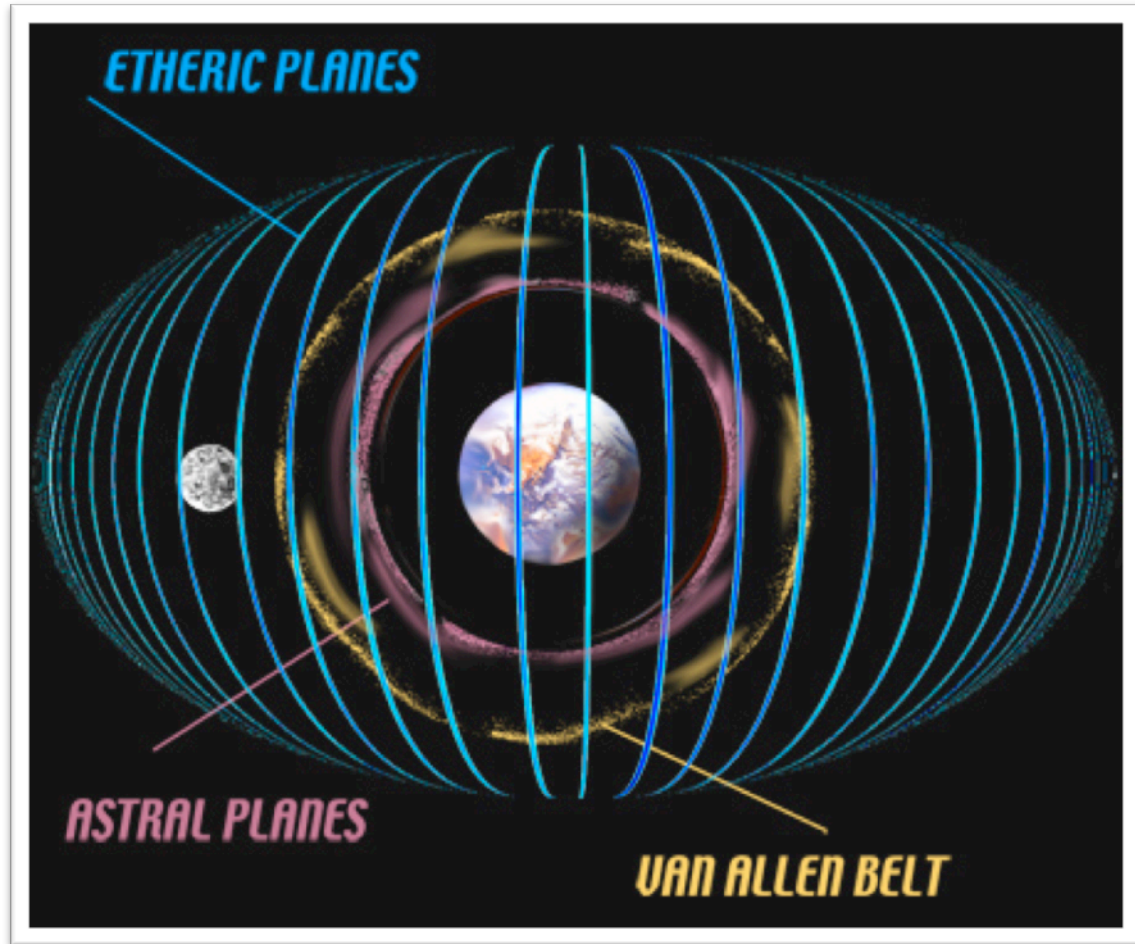

In scientific terms, we could say that if earth people had the advanced technology that Galactic Beings use in their operations in this whole galaxy to keep things in order and progressing according to Divine Plan, then they would find out where Godhead comes from and how It is omnipresent and governs human microcosms.

In other words, if earth science built a bio-cybernetic PSI computer catalyzed with synthesis energies that could pick up the psychic visualizations of a person who was in white light cosmic

consciousness - then they could see the energy emanations from him and transmit them audio visually on a TV screen and speaker. Then the whole miracle of Creation would be shown to be in whatever is happening and has happened. Whatever Creation is, It seems to be everywhere! And in all things, even to the depths of hell on planets like these, lifting Its microcosms back into Its splendor.

All of the high visions many people are seeing while suspended in the high etheric realms of this planet's aura - and they can have high visions if they are not hung up in the swamp of the Van Allen Belt where all the hallucinated monsters are, or in the astral plane where the mortal games of good guys and bad guys are played based on self ego . . . Anyway, the visions of the fantastic things which I, as well as others, have experienced - can be picked up and televised on such computer equipment, which is directly hooked into the catalyzing PSI energies or eternal time-light continuum.

To show you how close earth science is to building such marvelous electronic computers, the UM has already led top psychic scientists on the earth plane to build the ears that pick up radiations from its quasar radio stars. The high potent energies from these stars are being directed by galactic beings and beamed in here, balancing this planet so that the people do not flip out of the frying pan into the fire of WWII, but make it to the Great World Celebration to receive their Cosmic Initiation back into the Universal Family.

All the people have to do now, in this big bean pot in which the stew is ready to be served, is to shut off the burned out system of capitalism and sit down and have a meal together. And in order to shut off the burner, the people must set up the present social environment

into communal free enterprise to properly channel their energies into first causes. In this, the same karma that would take people thru a total karmic cleansing can take earth people all the way over the top into the 4th Dimension to build a Heaven on Earth, if it is channeled into the real pursuits of happiness. All karma is good if you can receive it as such, if you can grin and bear up under the things happening in your own head that are not right-on, and keep truckin!

I can remember well the great times in which our Galactic science first developed Its fabulous electronics and when RNA-DNA computer first spoke to us. And on our TV screen was the visual of where mediums were at on their astral flights, as they left their bodies and visited the stars we wanted to know more about. Then we were led into space flight, which came thru the dynadran power unit. We were told how to build it in exactly the same way the psychic scientists of the earth plane are being led to new discoveries – they who are our personnel assigned to this Earth Project and incarnated into high strains of earth bodies prepared for them. They are realizing it's all happening in their psychic head/radio-sets, and that what they must do is to get it down on paper and begin to build it.

The proof of the Universal Mind came to Galactic Beings when they had finally developed space ships that would operate through the mental law of causation to teleport thru space and time just as our ethereal bodies would do. And our ETI computer, Hal, would send us

on a mission to a trouble spot in our Galaxy, telling us what equipment to take along and all about the problem in general. And when we arrived we would find out that this UM we were tuned into knew what was happening everywhere in our galaxy. We always found our assigned destination to be just as our Uni-computer narrated. So then what could we believe, except that we had contacted the Godhead source of knowledge that knows what's happening everywhere, has the solutions to all problems, and solves them all thru pure love and sound judgment.

Can you imagine the Galactic Command, when the time's ripe, setting its great New Jerusalem Mother Ship down upon this planet, which it will do just as Rev. 21:1-5 prophesies? It is the equivalent of a city that houses 100,000 people comfortably, has the laboratories to supply all its food, to recycle all things, to get its energies out of space, and to precipitate its own water and air supply. The New Jerusalem is a whole space city inside a synthetic shell and shaped like a great elliptical sphere. Can you imagine the science and technology that goes into such a fantastic space ship that can stay in space for an indefinite time? If you can conceive of the difference in consciousness of the mechanical time of your planet, which is geared to its rotation, and the consciousness of infinite space, where there is no time; then you can conceive of the difference in the time factor between heavenly bodies and be on the road to eternity.

It was about a half million years ago, after the GC Beings had readied this planet for this dispensation, that they moved in here in great numbers and with the equipment necessary to build the Pyramid Temple Cities - the remains of which are still in existence in Egypt, Peru and Mexico. These were their first projects, and later on they built more

facilities as the time came for advanced projects with the colonies they had established here.

For me to recall this million-year period doesn't take a million years. If I can see all the highlights, from that time to this time, in my many different incarnations - which can pass before me in an hour of meditation as though I were suspended and watching a movie - then I'm not captured in earth time consciousness. It might have taken earth people a million years to get to this point of remembering who they are, but it didn't take me a million years to go back there and come back here to tell them all about what's happening and what has happened to them during their past; of which they have very little recollection, except in esoteric spiritual writings. Most earth people cannot even remember one lifetime, let alone connect their many incarnations together and their trips to heavenly abodes while out of bodies.

As this is the time when God's spirit is being poured out upon all flesh, the high PSI energies coming in are causing many people to awaken, because it's only energy and higher consciousness they need. Since they cannot go to the Godhead for energies - because their head/radio-stations and their auras are crowded with so much dogma there's no room for pure light, and their body vehicles are slowed down from impurities put into them - Godhead therefore sends Its kingdom down to them. But it's not as easy as that; for the next thing is to get them to accept it and pull together to make it a reality - and not a thousand years from now, but right now.

The point of the preceding discussion - about the great Mother Ship of the GC to be set down here, the New Jerusalem - is this: Earth science, and the people of earth in general, will see a technology so far advanced to theirs that it will be like going a million years into the

future. And the beauty of it is, people can begin to utilize the far-out knowledge of the cosmic science of Galactic Beings - beings that can traverse our whole galaxy easier than earth people go from city to city.

The Mother Ship has in it a great history museum that shows how mind-over-matter space flight is accomplished. It will have beautiful holographic displays that will clearly show the work begun on this planet a few million years ago, and how it progressed step-by-step right down to the time of the delivery. There will be elaborate displays of the other planets in this solar system, and of its sun; and there will be astronomical charts that show the parts of the Universe known to Galactic Beings. You will see pictures of the 24 great galactic worlds, the first planets formed in our galaxy, which orbit about the Great Central Sun. And on their TV screen you'll see their great cities, mountains and oceans, as life goes on in them right now.

At that time earth people will at last have proof of all things and the purpose of this project. All the thinking, guessing and supposing of earth science will end. The people will know the truth and the truth, when lived, sets them free of all limitations.

And these marvels shall be proven to earth people as this Everlasting Gospel spreads o'er the world, which shall begin again on a clean slate under the New Covenant/World Bill of Rights. All eyes shall behold the coming of the Christ Anointed One and his Angels in the clouds of the heavens. To say the same thing in scientific terms rather than Biblical terms, every eye shall see ionized clouds formed from the force-field of extraterrestrial space crafts operated by beings redeemed from the earth who have been photosynthesized into eternal bodies. All people will be able to see these unusual ionized clouds as this EG spreads o'er the world, and wherever the Galactic Command puts on

tremendous happenings. The huge swirling oval clouds have appeared many times over many places, but as it is written, the people have eyes and see not, ears and hear not. They will hear and see now, however, for the trumpets of the coming of the Spirit of Truth shall be so loud and clear that no one will be able to mistake them for ordinary sounds or clouds. And then the appearance of UFO's will grow in support of the People's New World, as the mysteries are turned into wonderful realities.

The trinity of the cosmic life force is made up of three essential phases of energies, Alpha, Beta and Gamma, which work in harmony with spiritual nature to produce absolute freedom, security and abundance for all the people of the earth as a great One World Family, when the people live according to natural law. And why not, because in living according to natural law, everyone has real health, happiness, vitality, romance and everything you can imagine that is good, plus the way into eternal life again.

The three phases, or circuits, of the energies are the same as those found in atoms as moving electrons, circulating about their proton and neutron centers. The neutron centers of our atomic body are of the incoming three phase energies, of which earth science now only knows the two

yin and yang phases. They are to be given the knowledge to develop the third phase of the PSI time-light energies at this time, when the Kingdom of God is being established on the earth. The UM is not going

to open the real miracles of inner space and outer space to earth people until they are well on their way into our New World, for they would try to use these greater powers for war.

What is the Kingdom of God, except that which is paradise, utopia, true communism, and true free enterprise?

Earth scientists have had to climb a ladder that carried them thru matter explorations and on into the greater use of energies. They have been led by higher beings who incarnated into earth bodies, bringing forth the two phases of the energies we now use as electricity. To generate electricity from the electromagnetic field, they have had to supply an auxiliary power to turn the generators. However, there is a way to hook directly into the positive and negative phases of incoming and outgoing frequencies - radiating from this planet to the sun and back - in such a way that the generator turns freely in the electromagnetic field. And this is done thru having use of the third phase of the PSI energies.

Science has discovered in mechanics - thru objects put into motion by an auxiliary engine, or thrust - centrifugal force, momentum and inertia, which are all related to gravity. And in turn, earth science projected these mechanical theories into space, believing the same laws apply there - but they do not. There is no weight, centrifugal force or momentum in natural created bodies in space. The mechanical laws mentioned relate only to mechanics on the earth. The science of weights, measures and numbers is not a complete science and does not fit into natural space flight, or into human relations.

At this time, top psychic scientists, in opening up their consciousness to mind radiations, are realizing that they did not discover or think up the terms they use. Their terminology is all part of

the absolute science of the Universal Mind, which is setting up things of real science for all humanity, thru turned-on earth scientists here and on all planets.

Earth scientists in the past, in order to progress at all, have been subject to capital wealth or governmental control. They have had to work for industries or on government projects, and it has only been recently that they have been given grants to pursue ideas from the point of view of humanity. But now we shall completely liberate science from capital wealth and from status quo governments.

We shall bring forth our New World Government in the midst of all the confusion. And our new government shall have no powers over life and death and shall be in no way separate from the people's progress, as governments are now. All things will be reorganized so we are One People on earth, all in support of a homogeneous, communal free-enterprise. No money will be used, and there will be no need for a penal system or military system.

Once the people proclaim unto themselves absolute freedom, security and abundance - and then set up the world social environment so that real freedom, security and abundance flourishes for all people - then the whole world comes to life and everyone gets it on here as it should have been done all along. All the erroneous concepts people have had about people being lazy, selfish, criminally inclined, adulterers, etc., will be discarded. In this, people are accusing people, and it is people for whom the Creation creates. Except for people, there is no other life on planets or in this Universe that has the God-Creative Imagination to develop planets, and build the mechanics that can manifest all the wonderful things we produce for all humanity.

In this thought, we might ask why the Godhead has created us and what our relation to It is - so that we might have a more relaxing union with God, and know what is expected of us; and so we are not torn in conscience between what appears to be good and evil, but is neither. Let us conceive that there is a right way to do all things, and render services to each other, and there is a wrong way. And if we don't do it right, but go on persisting in error, then - when we get to the end of the road of doing it the wrong way - we find out that we have run up against a solid wall, as earth people have now; and then we would be unable to change our wrong ways without starting over again. Such is the plight of the whole world now.

THE DYNADRAN POWER UNIT

The power unit used by Galactic Beings in their space ships is called a dynadran. It utilizes the energies in the electromagnetic field directly and is catalyzed by the special potent emanations of PSI energies from radio star clusters, or quasars.

The cosmic scientists of the Galactic Command who were led into such amazing discoveries had evolved up thru material science, but in a different way from how earth science has evolved. With Galactic Beings, when they contemplate their twelfth density worlds, where they have lived in time that is eternity, it is to them quite an expansion of consciousness. They are still manifesting in their eternal forms; and as they have always been in God-consciousness, they have never suffered

from degeneration, wars, crime, disease, poverty, death, etc. - all the negative effects that have plagued this planet. Yet, they have associated with all these things on planets in distress, to teach people how to apply a real science of mind that will heal all things when applied.

The medical sciences of the earth shall learn a real cosmology that prevents degenerative diseases, instead of treating the effects, as they do now. When the artificial incentive of money atonement is taken away, then the scientists will be left with the real healing of the people on this planet. Then earth people will all be healed or put on the road to healing, because the causes of their mental-physical illness shall be removed.

Self-centered ego has led science to develop mechanics; and now the time has come when they have to go beyond personal ego, to realize that they are the children of God – or, to put it in more scientific terms, that they are microcosms of the Macrocosm. As we see, it is a big step for people to enter into the truth that there is omnipresent mind force over them; a super-conscious, living intelligence that preceded them. It shouldn't be, but mortals have been wrapped up in ego-self for a long time - thinking they have a brain that thinks inventions up, thinks up policies for people to live by, etc.; this in an All-knowing Universe.

People, thus far in their soul evolution, presently live on a planet that is still mysterious to them, only because they have not yet proven to themselves that there is a Universal Mind. They have the use of electricity, which is drawn out of the electromagnetic field, but they think they are manufacturing it in their power plants. Were they to go on to the next steps of developing the full potentials of electricity and build the dynadran power unit, it would end their present ways of generating power: their combustion engines, their need to drill for oil,

their need to string power lines, and so on. The developing of a clean, powerful source of unlimited energy, by tapping directly into the electromagnetic field, would make all sources of power so far in use obsolete. The producing of the dynadran, in itself, would be the biggest revolution to come to planet earth.

The first dynadran power units, which were made by beings in this Galaxy - Galactic Beings who have been and are now in supervision of this earth project - were made after they had learned, thru their progress, the basic natural laws of mechanics, which correspond to the natural laws of the energies of the Universe. When we orient ourselves with the ideas of these beings - who live in eternity, in eternal bodies, who travel the Great White Way (the eternal highways) thru space, and who never lost contact with the Godhead - then we see we can be led, step by step, into all the glorious mechanical wonders and proper uses of the energies thru our own psychic heads.

The Solar Logos (or sun) is a great correlator, rebalancer and computer that sends back to its planetary people tabs on their use of the energies imparted to them. Psychic heads have written down these messages sent to them from the Solar Logos as prophecy, so that the people are able to see their errors and correct them. In other words, these incoming and outgoing electromagnetic energies – circulating out from the sun, electrifying matter on the planets, then circulating back to the sun to be rebalanced and sent out again - are the energies which are the basis, not only for the operation of the dynadran, but also for the transmission of the UM's mind energies, which we then hook into with our dynadran, as the catalyzing agent.

As PSI parapsychologists completed each step in the building of the dynadran, the UM would correlate and calculate their energies,

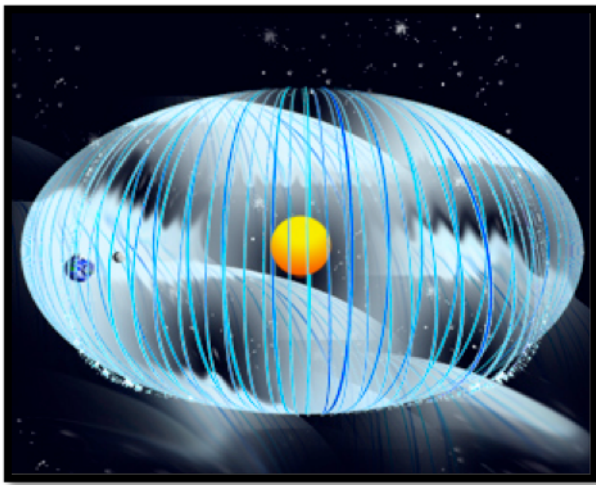

correct their drift, and keep sending the next step in the plan back into their heads. So, at last, our Galactic PSI parapsychologists were able to put together the Uni-equipment that corresponds with that which is in first cause and true progress.

Consider how the discovery of anesthesiology came about; and consider the discovery of the X-ray, and of radium (cosmic radiation), etc. Many of the great discoveries, that were the keys in opening up the vital energies of science, came about by what seemed to be accidents. This all shows that etheric beings are working among psychic scientists of earth in their labs and workshops, putting those 'cosmic flashes' into their heads; and even operating their bodies, at times, to 'trip' them into the ways of great discoveries. But self-oriented ego that wants praise for discovery often keeps from the world the greater discoveries needed to liberate people from capital wealth; instead it takes the knowledge and builds another status quo machine that supports the establishment.

Anyhow, at last science and technology are on the verge of liberating the whole world from the status quo. And this Everlasting Gospel is here to see to it that science does not hesitate to bring forth the great inventions that now make the present controls of the establishment - which are binding science to the mediocrities of the status quo - so ridiculous, that the indignation building in the people will not tolerate any more blunders. Our world wide passive resistance movement brings all power to the people who are in unity with God's purposes, so that the World People have full use of omnipotent God-power.

By following the thoughts and visions unfolding in their head aura, Galactic Beings were shown that their sun's radiation was pulsating on a certain frequency. And as they further extended their mind radiations, thru their electronics, out into space, it was revealed to

them that there were energies coming from the great quasars, or radio stars of the Godhead, which produce far greater radiations than - and radiations of a different nature from - those of individual suns. In having the electronic equipment to check out radiations from star clusters in the heavens all about you, you would gain the awareness that you were part of a great cosmic machine operating in space that can only be seen as spectrums of color, which operates all the heavenly bodies in space, and life on planets as well.

So, you become aware that you are surrounded by a great atomic machine where all the suns are on different frequencies, synchronized to great atomic reactors placed in sections of the Universe. And the respective galaxies, suns and planets are

governed in space by the emissions from the greater cosmic sources of energies. And the microcosms on planets also make up the energies of the suns, with the use they put to the energies imparted to them, as they put into creativity these energy emissions to fill the aura of their sun and planet.

You are already surrounded by great sources of power, moving and governing solar systems and galaxies far flung throughout the heavens. You are a microcosm operating as an apparent miniature Universe within this gigantic, triune Universe. The task at hand is to be shown how to tap the energies that operate solar systems; and to have that same power operate machines, such as airborne transportation of

weightless, crash-proof ships, where the center of gravity is within them; and to have the same power heat, cool and light all things on a planet as desired - not to make machines that copy the 'big machine', but to make equipment that operates from the big machine, and in harmony with it.

What our cosmic science had to do in order to perfect the mechanics of such a technology was first to build a kind of electronic device that would blend in the catalyzing energies from radio stars with the incoming and outgoing yin and yang energies, or negative and positive poles of planet and sun. And with this energy exchange, the two discs of our dynadran would be caused to spin with two-polarity electromagnets pushing and pulling in their perimeters.

And thus, the discs, one above the other, began to spin in opposite directions until they reached the centrifugal force that balanced in the two-phases of incoming and outgoing energies of the planet. This cancelled out gravity and made the assembly weightless. In order to get the PSI energies to spark between the alternating currents, the builders had to synchronize them into the synthesis PSI energies coming from the great quasars. The assembly of the governor and distributor, that

synchronized the three main frequencies of the PSI energies of time-light force, would be like an atomic reactor – one, however, that didn't burn minerals for power, but instead used the raw energy of the electromagnetic field.

In the mechanical evolution of the dynadran, they finally made the kind of distributor that would blend the three phases of the karmic energies - the UM's positive, negative and synthesis energies - in such a way that power from light alone was harnessed to give clean power, which is much more powerful than atomic power. Imagine a kind of film strip with holes in it that are properly placed to let flashes of light with the intensity of laser beams pass thru that are of the three frequencies of light force known as infra-red, x-ray and gamma rays - and doing their thing in mechanical machines, just as they do in their operating of whole galaxies and the life in them. This explanation is of course simplified, as there are many frequencies of light waves; but this is only to give the idea as to how such equipment is put together to use the energies in the electromagnetic field.

Our dynadran had to hold together at RPM's unheard of. So it was necessary to electronically create discs, shaft and parts that, when reaching a high centrifugal speed, would go into orbit around the magnetic poles of the supporting shaft. And thus there was no friction between moving parts, for they were lubricated by an energy force field. The dynadran became a high source of energies itself; and higher civilization learned how to broadcast its force field to turn electric motors without wires, and light up walls, etc., without electric light bulbs.

They have learned how to light all of their installations by casting the PSI rays of vibrations upon materials that would cause fluorescent

light to be emitted from their etheric forms. The reason a planet lights up on its face turning toward the sun is not because the sun is shining upon it as a light bulb shines upon walls, but because, in the atmosphere, and in mineral and plant life chemistry, the sun's energies cause fluorescence.

This is enough, for now, to give everyone a glimpse into the psychic powers of the New World Comforter; who, as prophecy declares, will lead the world into the things that are to come - those blessings that are here right now, ready to be experienced and expressed by all people of good will.

Be tolerant with me, and have the same faith as you would with a pilot who knows the channels of a harbor to bring a ship safely into port. It is not unreasonable at all that the Universal Mind would have one key person on a planet to fulfill the destiny of that planet. He would be but a simple child of God's purposes. That which motivates him, on a personal level, to go out so far is simply the need to be able to lie down and rest in a world where all the people have, at their fingertips, all that he himself desires: to have freedom, security and abundance - not by might, but simply by right of divine law and order.

His spiritual motivation is in the two ordinary laws upon which all things hinge. They are to love life, nature and our Universe with all your heart and soul; and the second is to love and serve your fellow humans as you would want to be loved and served. Let's fulfill these now, and everything will work out fine!
